The 4th KMI school - Statistical Data Analysis and Anomalies in Particle Physics and Astrophysics -

Thursday 15 December 2022

Poster session - KMI Science Symposia (ES635) (17:45-18:45)

title	presenter	board
BAO measurement of three-dimensional correlation function for photometric surveys	ISHIKAWA, Keitaro	
Simulation of stochastic inflation	MIZUGUCHI, Yurino	
Testing general relativity with the joint analysis of weak lensing and galaxy clustering from HSC-Y3 and BOSS	TANIDA, Koki	
Testing gravity by combining weak lensing, clustering and RSD	NORIAKI, Nakasawa	
The fate of subhalos in the pre-reionization epoch	NARUSE, Genki	
A study on the relation between formation history and observables of galaxy clusters	YOON, SEONGWHAN	
Dark photon search using B->Kllll decay at Belle	KIM, Yongkyu	
RSD analysis with Lyman alpha forest	NAKASHIMA, Koichiro	
CMB Constraints on the Early Dark Energy Phase Transition	HAYASHI, Shintaro	
Characterization of New VUV Silicon Photomultipliers with Low Dark Noise at Low Temperature	SAKAMOTO, Shun	
Development of a hybrid-photodetector for the DARWIN experiment	HASEGAWA, Tomoya	
DeeLeMa: Missing information search with Deep Learning for Mass estimation	BAN, Kayoung	
TBD	MANCUSO, Andrea
