

Mini-workshop on $D(^*)$ tau nu and related topics

Contribution ID : 3

BABAR Measurements of $B \rightarrow \tau \nu$ and $B \rightarrow D(^*) \tau \nu$ Decays

Monday 27 Mar 2017 at 11:20 (00h35')

Content :

Based on the full BABAR data set, measurements of the decay rates for B meson decays involving τ leptons will be presented. The results will be compared to Standard Model predictions, and first attempts to interpret the observed excess of events will be discussed.
